

ELiPLAN

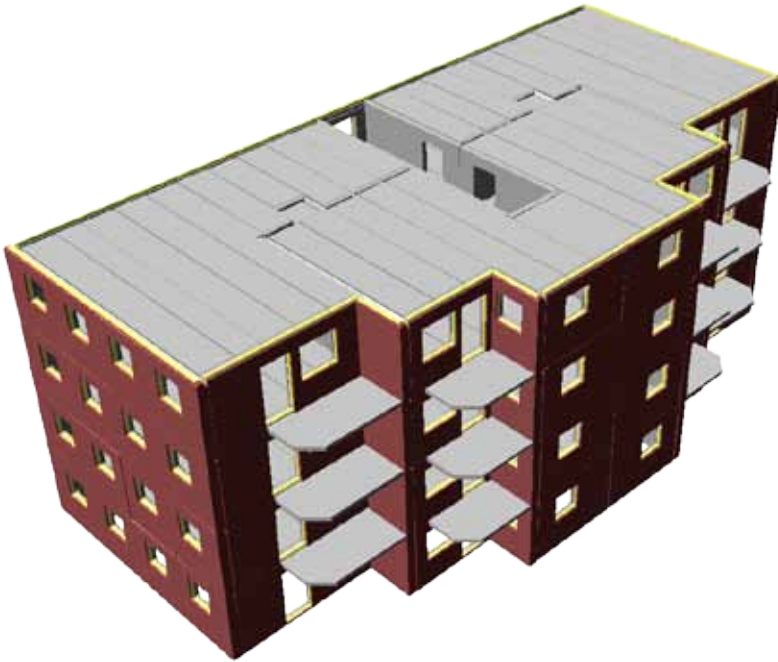

ELiPLAN

Elematic ELiPLAN is the most advanced Enterprise Resource Planning System (ERP) for complete control of the production flow in precast concrete factories.

This centralized real-time system can boost the efficiency of any precaster, comprehending the whole range of precast products, such as floor slabs, wall panels, frame structures, railway sleepers, etc.

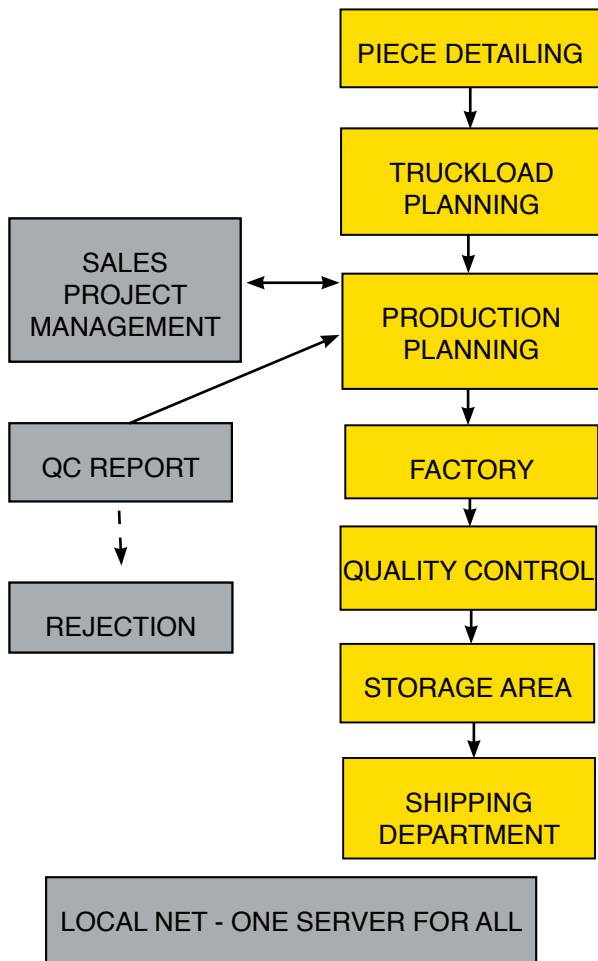

ELIPLAN

With ELIPLAN system modules you can develop the following operations:

- Bidding
- Project management
- Scheduling & Backlog Balancing
- Production Management
- Storage Management
- Shipping Management
- Material Management
- Maintenance Management
- Costing
- Quality Control
- Customer Relationship Management

Advantages:

- Proven track record
- Financial administration
- Other plants
- Designed specifically for precasters
- Part of the Elite solution – an unique two- directional integration of 3D modeling and precast production planning systems from Elematic and Tekla Structures
